DERMA HOME Guidebook

Alltherma™

Built on the same RF principle used in dermatology clinics, 1,000,000 Hz high-frequency energy that reverses direction a million times per second reaches deep into the skin. A 10-level RF care program focused on sagging around the cheeks, jawline, eyes and mouth.

How-to Video QR

Start level 2–3

Duration 10 min

Scan the QR code with your camera to watch the how-to video.

Areas Face / Neck / Shoulders

Smooth and firm from deep within— Powerful Tightening

Ultrasonic

800 kHz–1 MHz energy, as used in dermatology ultrasound care, vibrates up to a million times per second to reach deep into the skin. It stimulates collagen and elastin production and intensively firms and contours sagging cheeks, smile lines and the jawline.

How-to Video QR

Start level 2–3

Duration 10 min

Scan the QR code with your camera to watch the how-to video.

Areas Jaw / Smile lines / Wrinkles

Sagging cheeks, deepening smile lines— Ultrasonic restores **Firmness & Contour** at once

Iontophoresis

The same 2-way iontophoresis principle used in dermatology clinics. It thoroughly cleanses impurities from deep inside the pores, then drives ionized product ingredients deep into the skin for far greater absorption than simply applying them.

How-to Video QR

Start level 2–3

Duration 10 min

Areas Face / Neck / Shoulders

Advanced technology for **Maximum Absorption** the **Intuitive Answer**

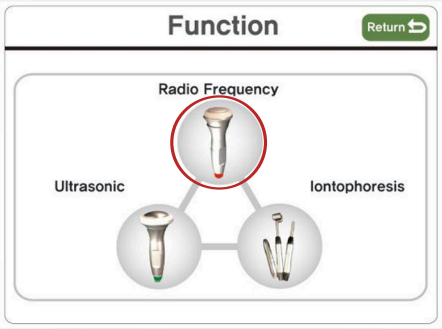

Start Screen

Touch the screen to continue
to the next screen.

Language Screen

Select the language
you want to use.

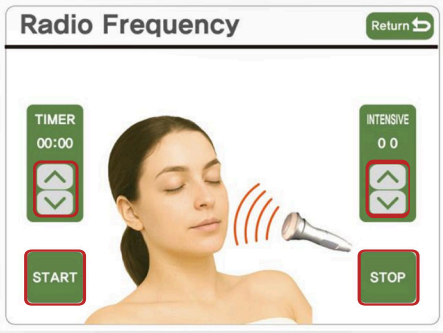

Function Screen

Touch the function
you want to use.

Apply Skincare

Apply the UNI&CORE product
of your choice to your face.

Function Settings

Set the time and intensity
with the buttons, then press START.

Firming Lift Routine

An intensive solution to lift sagging skin back up

① Apply UNI&CORE Deep Repair Nutrition Cream over the entire face.
② Select the **RF** function, set intensity 2–3 and time 10 min, then press Start.
③ Sweep the head evenly upward along the jawline, starting below the ear.
④ Repeat the same on the other side of the jaw.
⑤ Sweep wrinkle-prone areas from bottom to top.

Radiance Anti-Aging Routine

An intensive anti-aging solution that maximizes the power of Vitamin C

① Apply UNI&CORE Vita C 13.5 Whitening Ampoule over the entire face.
② Hold the **Stick (A)** head in your free hand and select **Iontophoresis**.
③ Set intensity 2–3 and time 10 minutes, then press Start.
④ Gently glide the **Roller (B)** head over the face, avoiding the eye area.
⑤ Gently glide the **Ball (C)** head over contoured areas, avoiding the eyes.
⑥ Finish by applying UNI&CORE Deep Repair Nutrition Cream.

Face All-Care Routine

Where care begins — a total solution for troubled skin

① Apply a thick layer of UNI&CORE Soothing Boosting Gel over the entire face.
② Select **Ultrasonic**, set intensity 2 and time 10 min, then press Start.
③ Slowly rub the head in circles over the gel layer.
④ Follow with steps 1–5 of the Radiance Anti-Aging Routine.
⑤ Finish by applying UNI&CORE Deep Repair Nutrition Cream.
⑥ Massage the jawline and cheekbones for 1–2 minutes to finish.

Can I use the device directly on bare skin?

We do not recommend it. Using RF on dry skin may cause burns or irritation. Ultrasound transfers almost no energy to the skin without a medium such as gel, so it has little effect. Likewise, iontophoresis works by ionizing skincare ingredients to aid absorption, so without product applied the function has no benefit.

Can I use it every day?

We recommend using Alltherma (RF) and Ultrasonic no more than 1–3 times a week. If your skin feels irritated during use, reduce the frequency.

Is a higher intensity more effective?

Not necessarily. The optimal output differs for each user, so choose the level that suits your skin. If it feels hot or stings, a lower intensity is better.

Which products should I use with it?

The device is designed to perform at its best with UNI&CORE lounge and skincare products such as the UNI&CORE Soothing & Moist Care Boosting Gel. It was developed together with these dedicated products, which also offer higher specifications than other brands.

Precautions

1) Do not use if you:

* Have an infectious disease, or a serious condition such as heart disease, gastric ulcer, severe stomach disease, duodenal ulcer, high blood pressure, diabetes or stroke.
* Are pregnant or breastfeeding, are menstruating, or are within 3 months after surgery.
* Have a fever of 38°C or higher.
* Have heart disease, a pacemaker or a metal implant.
* Have hemophilia, shingles, atopic dermatitis, systemic lupus erythematosus, systemic sclerosis, Addison's disease, etc.
* Are a woman with a bleeding disorder or injury, or who has an intrauterine device (IUD).
* Pregnant women must not operate or use the device and must keep well away from it while it is running.
* Keep out of reach of children. Minors must not operate the device.

2) Specifications

* EMC registration: R-R-BF80-BFLB683
* Electrical appliance safety certification: JD04028-14001D
* Rated voltage: AC 110V–250V / 50Hz–60Hz
* Size / Weight: 29.5 cm (H) × 29.5 cm (W) × 15.5 cm (D) / approx. 10 kg
* Manufacturer / Country of origin: BF Bio Co., Ltd. / Republic of Korea

3) Care and safety

* Check that the power supply matches the rated voltage of this device, and always use a grounded outlet.
* Check the maximum current rating of the power cord before use to prevent fire.
* If the plug fits loosely in the outlet or the plug heats up, replace the cord immediately with one of the same specification — it may cause fire.
* Do not wrap the power cord around other objects, especially ones with sharp edges, and do not place heavy objects on the device.
* Keep the power cord away from heat sources. A worn cord may cause fire or electric shock.
* Do not unplug the cord with wet hands, to prevent electric shock.
* When lightning is likely, unplug the device to prevent lightning damage.
* If the cord is damaged or cracked, replace it immediately with one of the same specification to prevent electrical fire.
* Do not use the device in unstable conditions such as tilting, vibration or impact.
* Do not let water or foreign objects get inside the device. If found, contact your dealer immediately.
* Avoid the following environments: direct sunlight, high temperature and humidity, vibration, sloping surfaces, sources of electromagnetic surges, chemical storage areas, corrosive gases, etc.
* To prevent interference and malfunction, do not use near radios, TVs or photocopiers.
* To prevent damage, never unplug the handpieces while the device is powered on.

Warranty

This product has been manufactured under strict quality control and holds safety certification
under the Korean electrical appliance safety regulations.
If a fault occurs, after-sales service is provided according to the terms below.

* If the main unit fails under normal use as described in the user manual, free repair is provided for 1 year from the date of purchase.
All accessories are consumables and may incur repair charges.

* Even within the warranty period, damage caused by user negligence (dropping, unauthorized disassembly, mishandling, etc.) or by accidents (fire, flood, natural disaster, etc.) will be repaired at a charge.

* To request a repair, present this warranty and contact your place of purchase or our service center (via KakaoTalk).
